

ADDENDUM NO.1

To all interested bidders:-

It has since been noted that in the likely event that any drilled borehole is tested and has saline water; the Authority recommends use of UPVC casing/screen piping and the HDPE DN for Auxiliary works but not GI material as is the case in the BOQ. Hence the need for this addendum.

This is therefore to advise all interested bidders to quote **items 2.17 and 4.9** as provisional sums as amended in the BOQ. The item will only be applicable where the water is found to be saline.

(See the revised BOQ)
